

The Mercedes-AMG A 45 4MATIC

Engine	AMG 4-inline
Displacement	1991cc
Transmission	AMG SPEEDSHIFT DCT 7-speed sports transmission
Power (hp/rpm)	381hp/6000rpm
Torque (Nm/rpm)	475Nm/2250 - 5000rpm
0-100kmh (s)	4.2sec
Top speed (kmh)	250kmh* 270kmh**
Brakes	Internally ventilated and perforated Front 350mm x 32mm, Rear 330mm x 22mm
Kerb Weight (kg)	1555kg
Vehicle length	4359mm
Vehicle width	1780mm
Wheelbase	2699mm
Boot capacity	341-litres
Fuel Consumption, combined (l/100km)	7.3 l/100km
CO2 Emission (g/km)	171g/km
* Electronically limited	** Vmax with Driver's Package

AMG 2.0-litre Four-cylinder Turbocharged Engine - 381hp, 475Nm

The Mercedes-AMG 45 is expanding its position on the market with its facelift: the power output of the AMG 2.0-litre 4-cylinder turbo engine, which was developed independently by Mercedes-AMG, was increased to 381hp and 475Nm by adapting the engine control system and a new exhaust camshaft. This means that it is still the most powerful series-produced 4-cylinder passenger car engine in the world. It combines fascinating power output, extreme stability and exemplary efficiency.

AMG DYNAMIC PLUS Package (Optional)

The A45 gets a Dynamic Select system – driving modes controlled by a rotary knob – that comes standard with four modes: Comfort, Sport, Sport +, and Individual. With the optional the AMG Dynamic Plus package (Code P71), the A45AMG is further equipped with a mechanical locking differential on the front axle, two-stage AMG Ride Control sport suspension with adaptive damping, and a Race mode. This makes the Mercedes-AMG A 45 ideally suited to fast laps on the racetrack.

Dated 7 Jan 2016
