

**New Arteon.**

**Volkswagen**

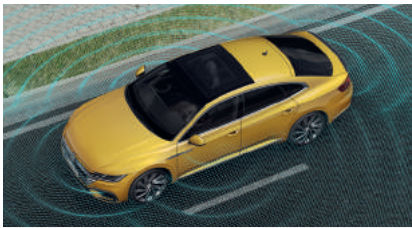

# Highlights.

**Powerful TSI engine**  
With a high power output of 280 PS, the turbocharged TSI petrol engine of the Arteon delivers smooth and exciting driving performance in all conditions.

**4MOTION**  
Driving pleasure with reassuring stability – the 4MOTION all-wheel drive system provides optimum traction and keeps the Arteon firmly on track no matter the driving conditions.

**Area View**  
This all-around camera system provides a bird’s-eye view of the area around the Arteon on the infotainment system display.

**Head-up Display**  
Data is projected on a retractable glass panel with laser-etched texturing, allowing important information such as driving speed and navigation data to be displayed directly in the driver’s field of vision.

**Active Info Display**  
A 12.3-inch high resolution, digital instrument cluster offers the driver customisation options for displaying navigation, infotainment and other important information.

**App-Connect**  
Three innovative technologies allow you to integrate selected smartphone apps onto your infotainment system’s touchscreen: MirrorLink™, Android Auto™, and Apple CarPlay™.

**‘Discover Pro’ infotainment system with gesture control**  
Everything at your fingertips: the new 9.2-inch ‘Discover Pro’ infotainment system with gesture control features a user-friendly interface that can be easily operated by using swipe gestures to switch pages. For example, with just a single hand movement, you can switch radio stations or songs on your playlist.

**Front Assist with City Emergency Brake and Pedestrian Monitoring**  
This system monitors the front of the Arteon and warns of potential collisions. At speeds of up to 50 km/h, it can brake the car completely to a halt to prevent an accident with a vehicle or pedestrian.

# Safety.

**Side Assist with Rear Traffic Alert**  
As you drive, rear radar sensors warn you about vehicles in your blind spot. While reversing out of a parking space, Rear Traffic Alert can detect approaching vehicles and sound an alert. It will also initiate the emergency braking function if necessary.

**Proactive occupant protection system**  
The system detects and predicts a potential accident situation even from the rear, and reacts by tensioning the front seatbelts and closing the windows to maximise safety.

# Technical data.

Arteon R-Line 2.0 TSI	
Engine	
Engine type	4-cylinder, TSI petrol engine with 16 valves, turbocharger
Capacity L / cc	2.0 / 1,984
