Transmission	AMG SPEEDSHIFT DCT 8G
Power (hp/rpm)	306 hp / 5,800 rpm
Torque (Nm/rpm)	400 Nm / 3,000-4,000 rpm
0-100km/h acceleration (sec)	5.2 sec
Top speed (km/h)	250 km/h
Kerb weight (kg)	1,680 kg
Fuel consumption (l/100km)	7.6
VES band	C1

Mercedes-AMG GLA 35 4MATIC - Not an SUV. An AMG.

Driving Performance meets urban lifestyle: The entry point to the world of performance SUVs is now represented by a particularly impressive vehicle, the Mercedes-AMG GLA 35 4MATIC. In technical terms, the stand-out features of the GLA 35 include its powerful and fully variable AMG Performance 4MATIC all-wheel drive system and a dynamically tuned suspension. Its unmistakable styling, superb handling and state-of-the-art interior set the benchmark among its competitors.

This visually fascinating vehicle is aimed at a target group that prefers to spend most of its time in the big city. It is a group that also attaches considerable importance to sporty driving performance and to the exceptional, individualistic character of Mercedes-AMG.

Spontaneous response behavior

The AMG SPEEDSHIFT DCT 8G dual-clutch transmission also contributes to the agile and dynamic character of the new GLA 35 4MATIC. The gear ratios have been configured so that the driver experiences very immediate acceleration in all speed ranges, combined with fast shift times and optimum connections during gear changes.

The standard RACE-START function allows maximum acceleration from stationary and is a highly emotively appealing experience. The functions of the AMG SPEEDSHIFT DCT 8G transmission are rounded off with a temporary M mode activated by operating the steering wheel paddle shifters in any drive mode, and with the manual transmission mode "M" for manual gearshifts with the paddle shifters.

Updated as of 04-Nov-2020
