REFRESHED EXTERIORS

The Luxe and Crosstar sport new front grilles, as well as front and rear bumper designs — creating truly elegant and rugged silhouettes, respectively. These stylish, yet distinctive new looks are further accentuated by updated LED headlights and brake lights designs.

The Jazz range has two new eco-friendly additions. While the Luxe boasts a dynamic and distinctively modern look, the Crosstar is definitely for drivers with a sportier lifestyle. Both of these handsome hatchbacks feature Honda's e:HEV technology — supporting real driving performance, while achieving amazing fuel economy and low emissions.

A MORE COMFORTABLE RIDE

Comfort is key and every feature thoughtful. From the moment you sit down, feel extra supported and cushioned with the car's new ergonomic seats. For a more comfortable view while driving, windshield wipers are discreetly positioned, and the newly-designed front pillar with its cross-sectional structure creates super wide and superior frontal visibility.

Ergonomic Seats

For the first time among any Honda models, front seats feature body stabilising support. At the same time, back seats include thicker, softer pads. So even on long drives, everyone is more comfortable.

Tall Mode

Fold up rear seats to create space for taller objects like potted plants. Rear cargo area remains spacious and unchanged.

Long Mode

Recline a front and rear seat to create a long storage space for items such as surfboards to be easily loaded.

Utility Mode

Lower both rear seats to maximise the cargo area. Easily store large items such as bicycles on the fully flat floor.

Specifications may vary from model(s) shown.

EXTRAORDINARY EFFICIENCY

Expect even more from this leader in class. Improved suspension means a more comfortable daily ride, while a larger 9" display audio puts your apps and controls within easy reach. And once you walk away from the car, the doors auto-lock. Fuss-free, thoughtful everyday efficiency from A to Z.

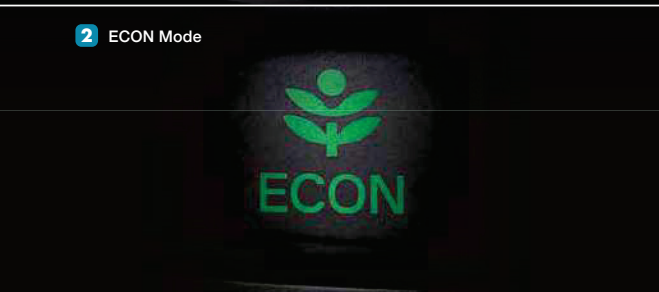

1 9" Display Audio with Apple CarPlay / Android Auto Support

3 Electric Parking Brake

5 7" TFT Multi-Info Display Meter

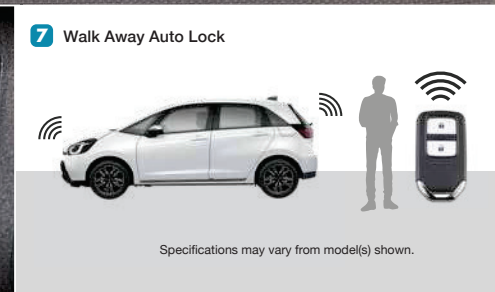

2 ECON Mode

4 One-Push Start

6 Power Sockets and USB Ports

7 Walk Away Auto Lock

Specifications may vary from model(s) shown.

e:HEV FOR EXCEPTIONAL

The new Jazz is the first model to be presented under Honda's new e:HEV branding, engineered to deliver enjoyment to the driving experience. It comprises two energy-dense electric motors, a 1.5-litre i-VTEC petrol engine, a lithium-ion battery and an innovative fixed-gear transmission, which all work harmoniously together to deliver the best ratio of fuel economy to acceleration in its class.

Electric Vehicle (EV) Drive

The electric motor provides propulsion to the wheels only when the vehicle is stationary or driven at low speeds.

Hybrid Drive

The electric motor provides propulsion to the wheels. Simultaneously, the petrol engine drives the generator and supplies electricity to the electric motor for added propulsion, or to the high voltage battery for charging.

Engine Drive

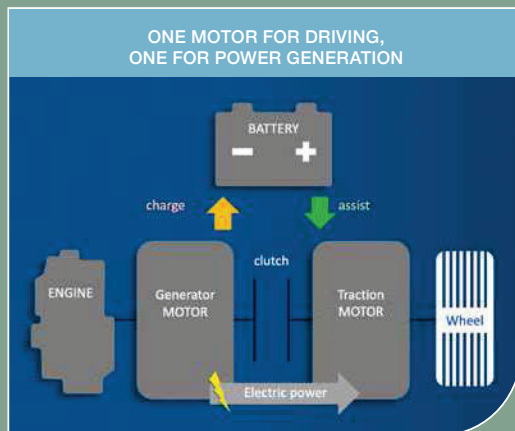

The petrol engine provides propulsion to wheels while a high voltage battery supplies electricity to the electric motor for added propulsion. The electric motor also provides electricity to the high voltage battery through regenerative braking.

Electric Vehicle (EV) Drive

The electric motor provides electricity to the high voltage battery through regenerative braking.

EFFORTLESS EFFICIENCY IN EVERY MODE

The advanced e:HEV set-up seamlessly selects from three interchangeable drive modes. Its two motors and engine operate independently, so driving is highly efficient in every scene. Fuel economy is an impressive 4.4L/100km, and every journey effortless and comfortable.

NEW e:HEV POWERTRAIN

1.5L DOHC i-VTEC®

Electric CVT with 2-Motor Hybrid System

Specifications may vary from model(s) shown.

A NEW REALM IN SAFETY

You've never been this well protected on the road. Starting with advanced safety and driver assistive technology enhancements like Hill Start Assist (HSA), Vehicle Stability Assist™ (VSA™) and Emergency Stop Signal (ESS). The new Jazz also features Honda Sensing, a suite of cutting-edge safety features like no other.

1 Hill Start Assist

Helps drivers accelerate smoothly from a stop position on an inclined surface.

2 6 Airbags System

As part of the world's first system developed by Honda, six quick-deploying airbags provide advanced passenger protection and injury reduction.

3 ISOFIX

ISOFIX child seat can be easily connected to all seat anchor points and attached securely on all sides for optimal stability.

4 Anti-Lock Braking System (ABS)

Prevents wheel lock-up during emergency braking situations and on slippery road surfaces. Increases vehicle stability and control during deceleration, minimising accidents.

5 Multi-Angle Rear-View Camera

Dynamic guidelines offer three switchable views of the rear of the vehicle. So reversing into a parking lot is easier, no matter the size or lighting conditions.

6 Vehicle Stability Assist™ (VSA™)

Regulates engine's output and selectively applies brakes to maintain traction on slippery roads. Helps bring car back on track during cornering when it deviates from its correct path.

7 Emergency Stop Signal (ESS)

Automatically activates brakes and hazard warning lights when it detects an emergency stop situation.

Specifications may vary from model(s) shown.

Honda SENSING

A new dimension in intelligent safety technology, Honda Sensing protects you intuitively and without compromise. With preventive and reactive safety technologies this advanced, every drive offers peace of mind, unparalleled.

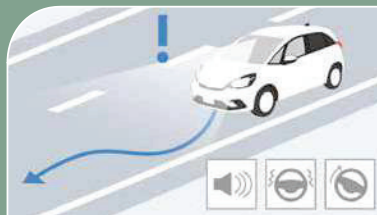

- 1 Adaptive Cruise Control**
Helps maintain a constant speed by automatically speeding up or slowing down to keep a set following distance behind the car ahead — all without having to keep a foot on the accelerator.

- 2 Collision Mitigation Braking System**
Designed to detect and alert the driver of a potential collision. It also reduces vehicle speed to minimise impact if a collision becomes unavoidable.

- 3 Lane Keeping Assist System**
Helps to keep the vehicle in the middle of a detected lane, preventing it from accidentally drifting out of its lane.

- 4 Road Departure Mitigation System**
Alerts the driver when it detects the vehicle may have unintentionally deviated from its lane or is suddenly leaving the roadway altogether.
