

sienta

Move your world

THE CAR THAT GIVES YOU MORE.

The All-New Toyota Sienta Hybrid quite simply gives you a whole lot more to love. No matter whether you're doing the daily school run, bringing home the weekly groceries or taking off on a weekend family trip, you'll always find there's more to look forward to.

MORE SAVINGS

As the only COE Category A hybrid MPV[^], buying an All-New Sienta Hybrid means more value for money. And because it's a Toyota Hybrid in VES band A2, you'll also enjoy \$15,000 in VES savings.

MORE FUEL EFFICIENCY

The self-charging hybrid engine does an amazing 25.0km/ℓ—which means less refuelling and more convenience—with fewer trips to the petrol station!

MORE SAFETY

Along with the assurance of Japan-built quality, relax in the knowledge you and your family are protected by Toyota Safety Sense—as well as enhanced passive safety features.

MORE COMFORT

The All-New Sienta Hybrid is the perfect 7-seater MPV, offering better head and legroom, as well as versatile seating arrangements that you can easily configure to suit your needs—whether it's a road trip on your own or an outdoor picnic for the whole family!

MORE FUNCTIONALITY

Enjoy the convenience of push-button powered sliding doors, wireless connectivity to both Apple CarPlay® and Android Auto™, smart entry and start system, and a 9" touchscreen multimedia system, making every journey more enjoyable.

[^]The only COE Category A Hybrid MPV refers to vehicles offered by our Authorised Dealers only.

The images in this brochure feature vehicles that may have different details and specifications to those available, depending on the variant. Please refer to the display unit in our showroom for the actual specifications.

MORE *style*

The All-New Sienta Hybrid also has a head-turning fresh look with new curves and side-protection details. Inspired by the “Shikakumaru” design language—a Japanese term for circles and squares. The rounded corners create a more compact appearance, while the overall shape means even more manoeuvrability, making the car as practical as it is aesthetically pleasing.

REAR COMBINATION LAMPS*

The elegant, modern design of this dot-patterned rear lamp array blends seamlessly into the body of the car.

FRONT LAMPS

Make everything clearer. Full LEDs in the main headlamps mean brighter roads ahead—making driving safer.

ALLOY RIMS*

The striking design and contrast of gleaming alloy and black paint add to the stylish character of the car.

*For Elegance variant only

MORE

features to love

Take your seat behind the wheel of the All-New Sienta Hybrid and you'll find an array of technology designed with you in mind—from a multi-info display to wireless entertainment control and steering wheel-mounted switches. Even gear selection has been made effortless. More control of every drive is all within reach.

WIRELESS APPLE CARPLAY® AND ANDROID AUTO™

Sync up seamlessly, with a 9" touch screen multimedia system and wireless connectivity to both Apple CarPlay® and Android Auto™—keeping you and your passengers entertained with your favourite tunes on every journey.

DRIVE MODE SELECT (ECO/NORMAL/POWER/EV)

You've got to love having a choice. Especially when it comes to how you drive. Select ECO to get the most mileage from the fuel and battery, NORMAL for everyday driving, POWER for faster throttle response and EV mode when you want to use electric power only (great for low speeds, short distances and emission-free journeys).

SHIFT-BY-WIRE SYSTEM*

The shift-by-wire system engages driving modes electronically, making gear selection smoother and faster, improving your overall driving experience.

KEYLESS ENTRY AND PUSH START SYSTEM

Now you can open the doors without taking the key out of your pocket—while the car will start with the push of a button. Easy!

DIGITAL MULTI-INFO DISPLAY*

This clear, easy-to-read digital display keeps you informed of everything that's happening with the car, delivering all your essential driving data.

FINGERTIP SWITCH ARRAY

We've put the switches where they're easiest to reach while you're driving—on the steering wheel itself, which puts the control of everything, from the cruise control to the radio volume, at your fingertips!

*For Elegance variant only

MORE *functionality*

Riding in the All-New Sienta Hybrid isn't just great for the driver, but for everyone in it, with features designed to make every trip a more enjoyable experience.

1/ **PUSH-BUTTON POWERED SLIDING DOORS**

For even greater convenience and ease, you only have to touch a button for the rear door to slide open and closed—making getting in and out of the car easy for passengers—even the smaller ones. This feature is available on the left door in the standard model, and on both doors in the Elegance Variant.

2/ **CONVENIENT CHARGING***

Keeping your devices charged is a big part of staying connected today, so the All-New Sienta Hybrid has more USB-C charging ports and even pockets to hold mobile devices on the back of the driver's seat, making it easy for passengers to charge up on the go.

3/ **STORAGE EVERYWHERE**

You can never have too many storage spaces—especially if you're travelling with the family. So the All-New Sienta Hybrid offers lots of places to put all things great and small!

*For Elegance variant only

MORE *comfort*

1/ WINDOW SUNSHADE*

Keep your cool. These window sunshades protect passengers in the second row of seats from glare and bright sun—which helps keep the temperature inside down, too!

2/ AUTO FOLDING MIRROR

This mirror folds flat automatically when you park and lock the car—making it even easier to get in and out of tight spaces.

3/ AUTOMATIC AIR-CONDITIONING WITH NANOE™ X (-) ION GENERATOR

The nanoe™ X (-) Ion Generator produces particles that neutralize odours, bacteria and viruses in the air, making them less effective. The result? Clean, fresh air for you and your family inside the Sienta Hybrid!

4/ VERSATILE SEAT CONFIGURATIONS

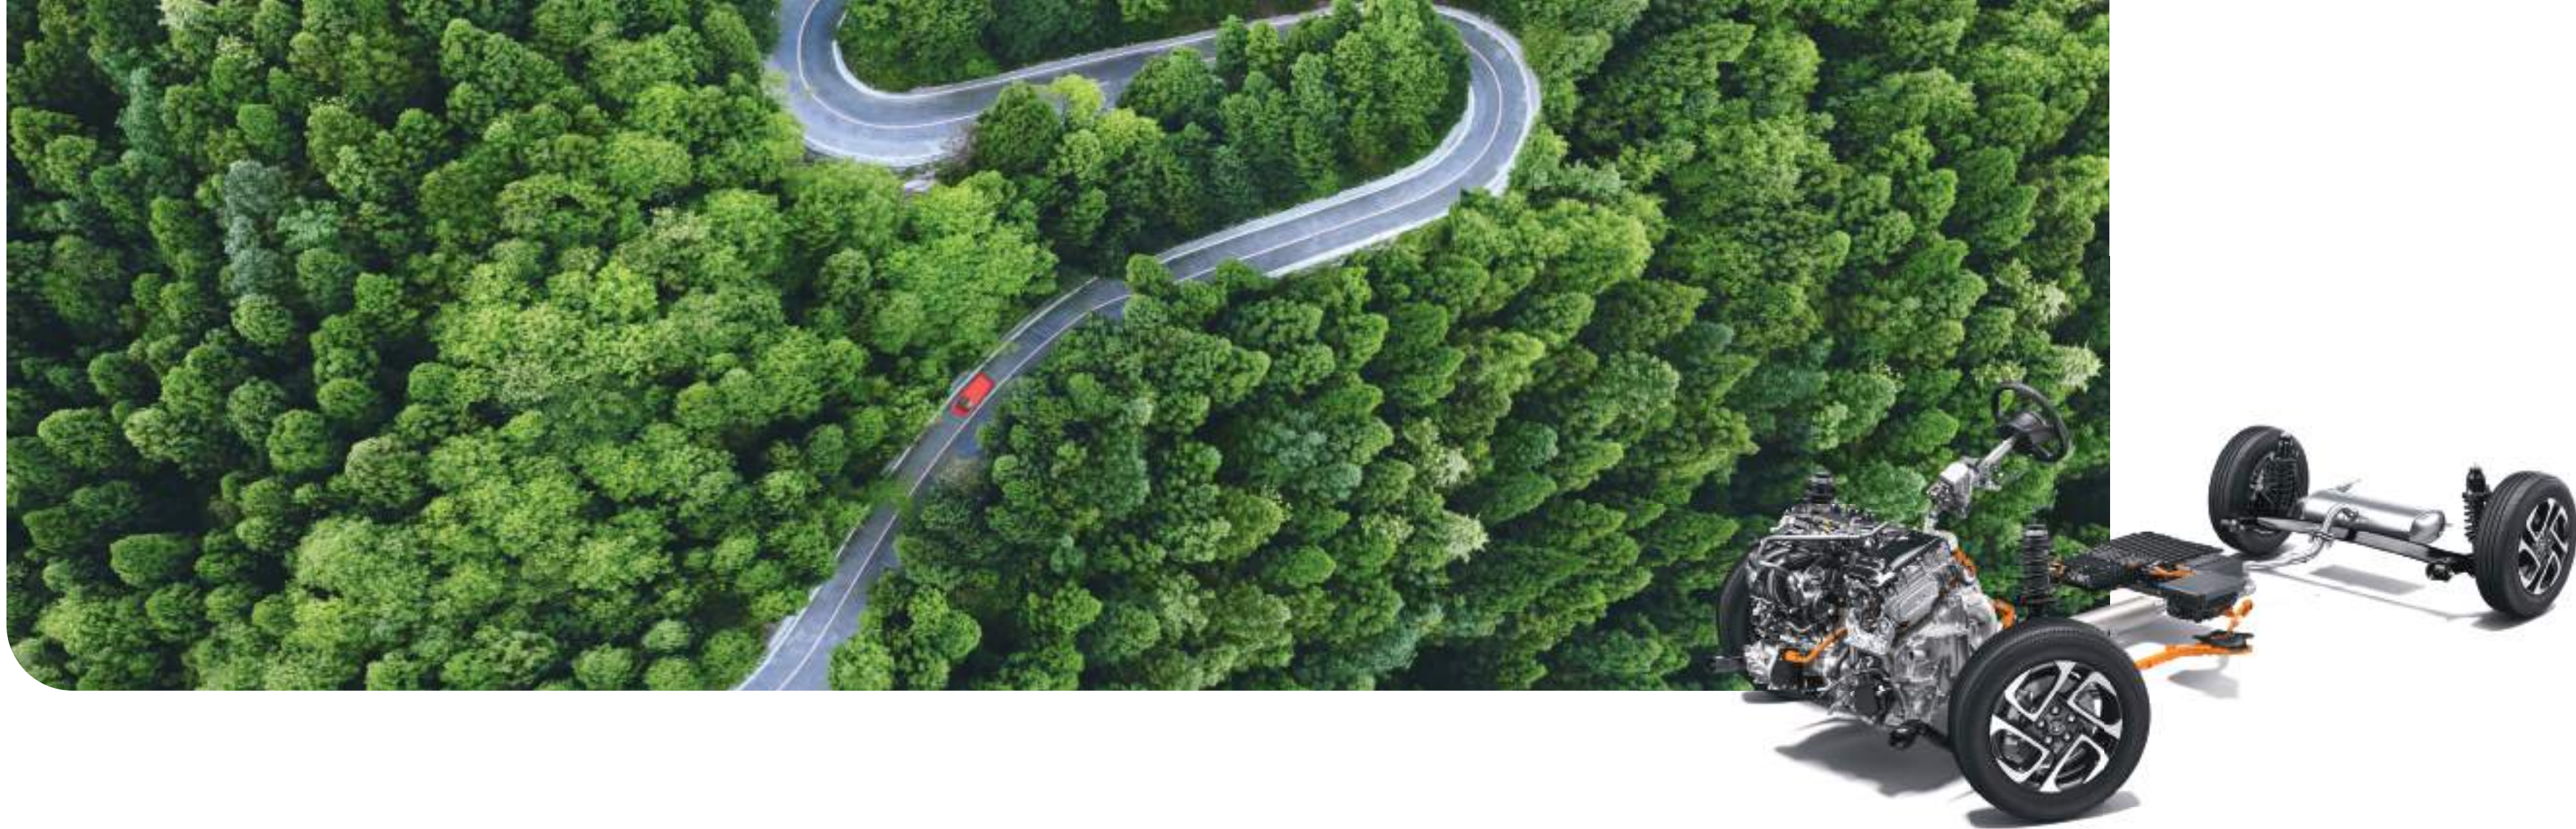

The All-New Sienta Hybrid is a spacious 7-seater with configurable seats designed to make everyone in the car comfortable. So no matter what you want to fit in—from packages to picnics—the Sienta Hybrid is designed to suit your lifestyle.

*For Elegance variant only

HYBRID

The self-charging 1.5ℓ Dynamic Force Engine with its electric motor provides greater power and fuel efficiency—letting you go on more journeys for less, with no compromise on performance. The hybrid powertrain also enables you to do your part to help reduce your carbon footprint for our future generations.

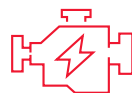

SELF-CHARGING

The power behind the All-New Sienta is an efficient self-charging system, which uses the energy from everyday drives—like braking, for instance—and turns it into power you can use. So you'll never need to plug the car into a power point.

NO ADDITIONAL MAINTENANCE

There's no need to re-think your service schedule, as our hybrid system doesn't need any more maintenance than a traditional petrol engine.

AMAZING FUEL ECONOMY

The All-New Sienta Hybrid produces figures of 25.0km/ℓ—making it remarkably economical to drive.

SEAMLESS ACCELERATION

The combination of petrol and electric power means instant acceleration, even from rest—giving you a smooth start to every journey.

LOWER CO₂ EMISSIONS

Using less petrol means producing less CO₂. So you're not just saving money, you're doing your bit for the planet, too!

A QUIET CABIN EXPERIENCE

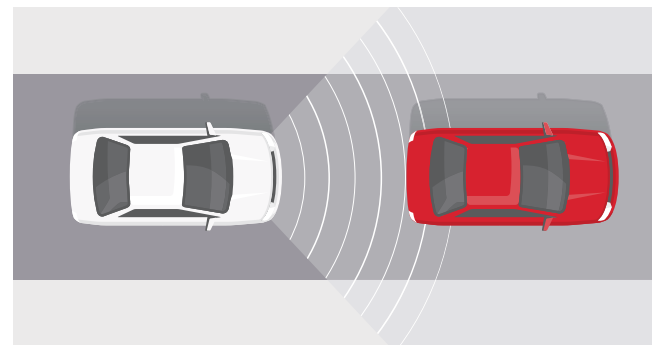

Another benefit of our hybrid engine is its remarkable quietness and lower vibrations, making every journey smoother and more pleasant for everyone.

MORE *peace of mind*

Wherever you and your family are heading—near or far—we want every drive to be safe and secure for you. That's why the All-New Sienta Hybrid comes complete with Toyota Safety Sense™ (TSS). Packed with active safety features, TSS is designed to help protect you and your passengers and ensure that every journey comes with more peace of mind.

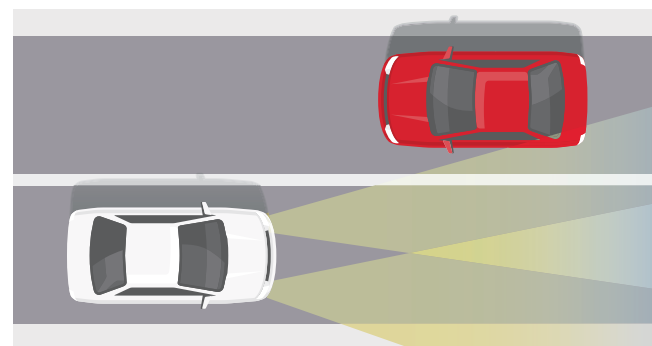

Toyota
Safety
Sense

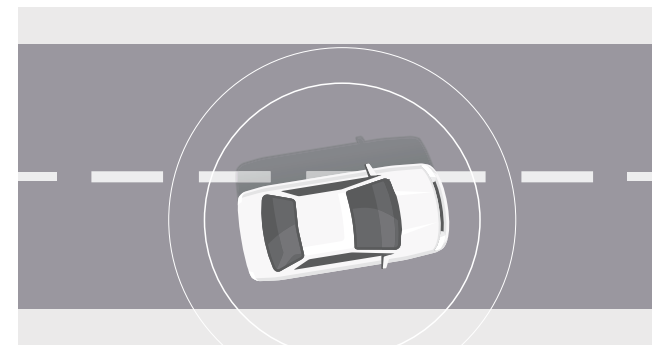

DYNAMIC RADAR CRUISE CONTROL (DRCC)

Enjoy effortless cruising with Dynamic Radar Cruise Control (DRCC). Forward-sensing radar technology and an intelligent camera enable the system to detect the speed and distance of the vehicle traveling directly ahead of you and adjust your speed accordingly. In heavy traffic, it maintains a pre-set following distance, slowing when it shortens and accelerating back to your original cruising speed when the road clears.

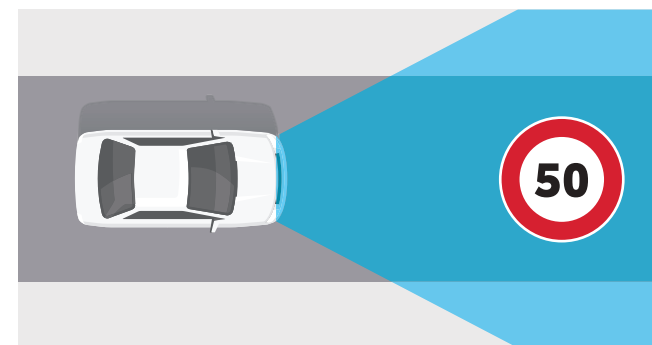

ADAPTIVE HIGH-BEAM SYSTEM (AHS)*

This smart sensor detects the headlights and taillights of cars in front of you, and automatically optimizes the headlamp light distribution to ensure you never dazzle other drivers, making driving safer for you and your fellow road users.

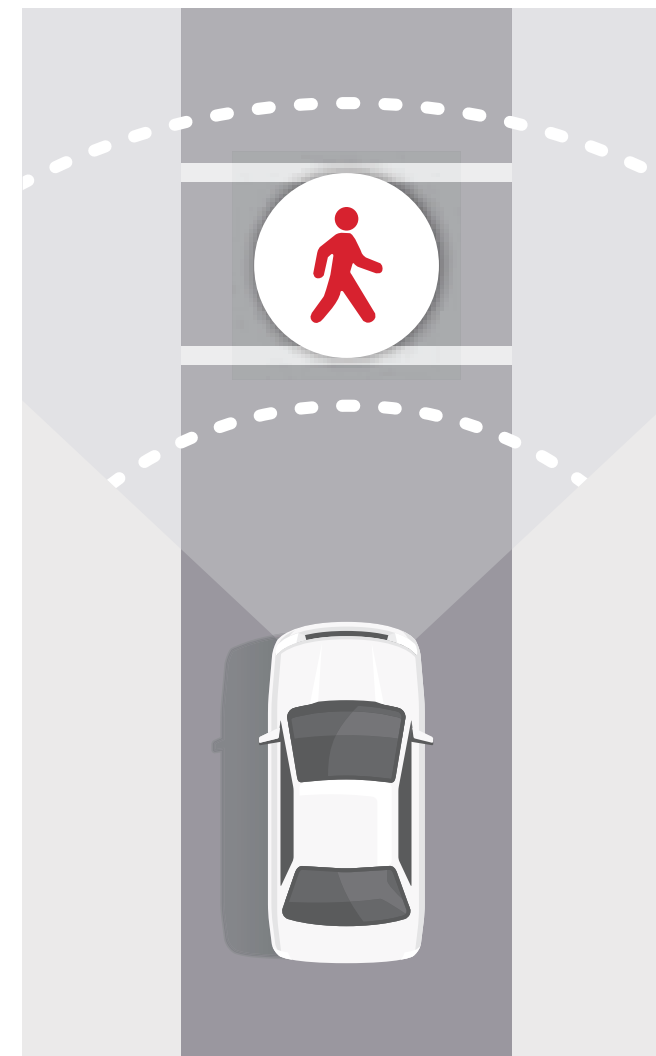

LANE TRACING ASSIST (LTA) AND LANE DEPARTURE ALERT (LDA)

Lane Tracing Assist (LTA) uses the lines on the road and the vehicles ahead of you to help keep the car centered and in its lane when the DRCC is activated. The Lane Departure Alert (LDA) system identifies visible lane markings and detects any inadvertent lane departure. It will then give you an audible alert and a visual warning. If the system determines that the driver is not taking corrective steering action, the Steering Assist function is designed to initiate and provide gentle corrective steering to help your car stay in lane.

ROAD SIGN ASSIST (RSA)

RSA can detect speed limit signs and can be linked to the DRCC to help drivers comply to the speed limit.

PRE-COLLISION SYSTEM (PCS)

In certain situations, the Pre-Collision System with Pedestrian and Cyclist Detection can detect and alert you to an oncoming vehicle or a pedestrian/cyclist—even while turning corners. By combining a millimetre wave radar and a camera capable of recognising shapes, the system will warn you of a possible collision and, in certain conditions, brake automatically if you don't react in time.

MORE *safety features*

6X SRS AIRBAGS

Wherever you are in the cabin, you can rest assured that you're protected by front, side, curtain shield airbags in emergency situations.

PARKING SUPPORT BRAKE (PKSB) AND FRONT AND REAR PARKING SONAR

The All-New Sienta Hybrid will give you an audible alert to warn you if the front and rear sensors detect stationary objects or vehicles nearby. If the system determines there may be contact, it will send an alert inside the vehicle and reduce engine power or apply the brakes.

REAR MONITOR

Take the difficulty out of reversing into any parking lot. The reverse sensors and camera give you better awareness of any obstructions while parking.
